

# UC-4 (RetireUser)

对比参考答案中的domain model，发现自己的domain model基本上相同，但存在以下问题：

1. concept name 命名不是很精确
2. 缺少关键的Responsibility : Usermanager (Operate the system to manager the users, including retire user, add user and transfer admin.)

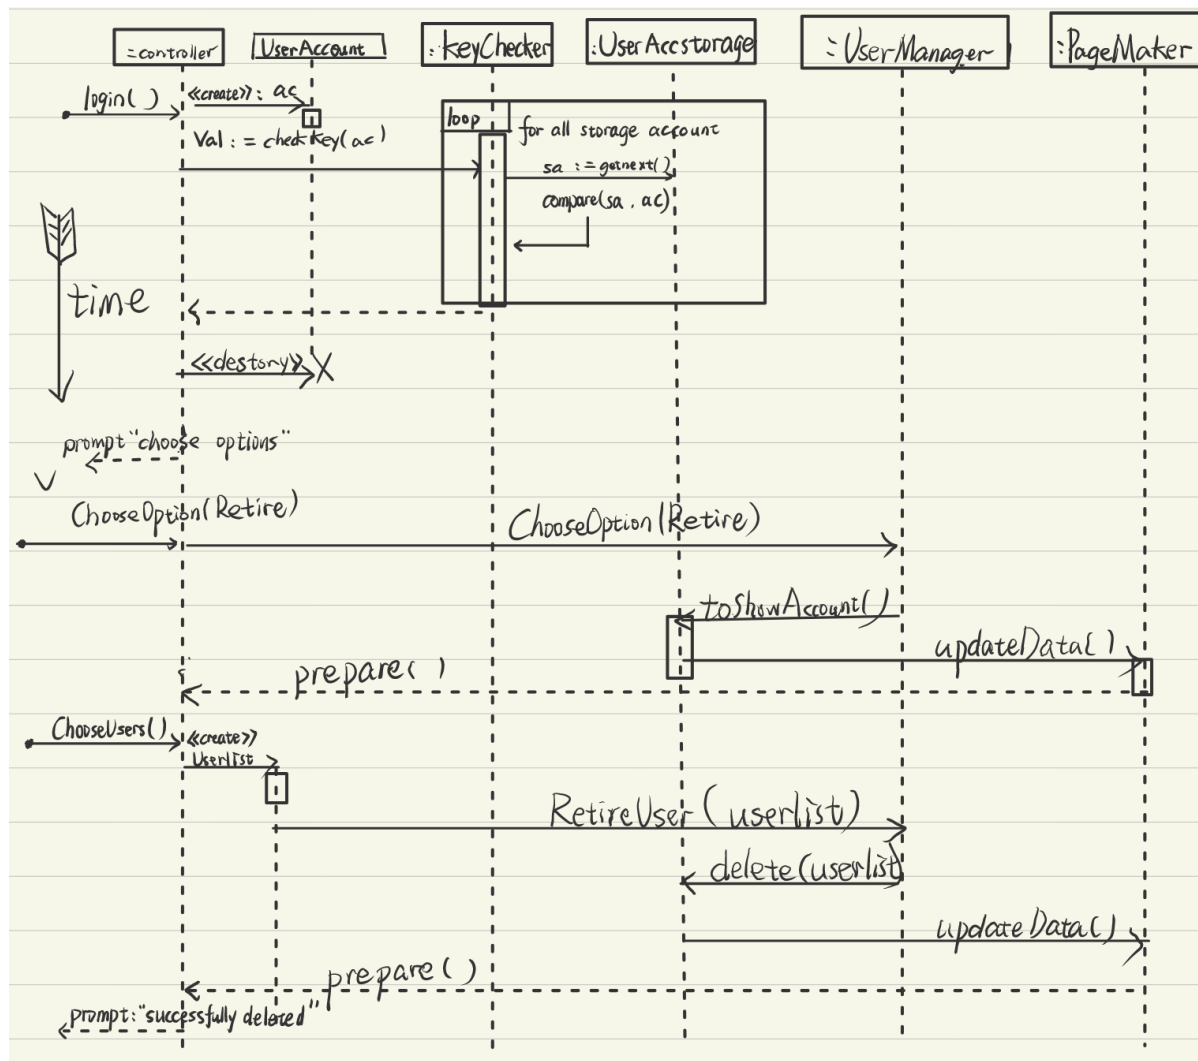

故将domain model修改成与参考答案相似。为方便起见，下列diagram在参考答案的基础上完成。

## design sequence diagram

Use Case UC4: RetireUser (plan of action):

1. User select function("Manage Users") and log in
2. System display the options of activities available
3. User select function("Retire User")
4. System prompt user to choose user account to delete
5. User choose user account
6. System delete the selected user account and prompt successfully deleted
